

## EDITORIAL / УВОДНИК

My Dear and Honorable Colleagues,

The 2018 behind us, and 2019 ahead of us, let's recap what we have accomplished and where we are trying to get.

As EiC appointed in April 2018, the 1<sup>st</sup> issue fully edited by my team was the May-June 2018 one and I am proud to say that we are going strong since regular bi-monthly publishings enabled catching up on substantial delays: all papers accepted in 2016 and majority of the 2017 ones (*over 70 accepted and unpublished from 2016/17 period*) appeared in both digital and paper editions by end of 2018.

Nevertheless, it didn't stop us from processing new submissions within 60 days and getting top priority research results published in reasonable timeframes.

With the Serbian Archives of Medicine being the oldest medical journal in Serbia, we strongly feel and believe that it is not only our responsibility to maintain its standing, yet it is our duty to remain beacons of scientific thought void of all aberrant behaviours known to modern publishing and research. In that regard, aiming to try to control blooming plagiarism chiefly, the Serbian Medical Society accepted our proposal – and that of the reconstructed Editorial Board – to purchase and implement starting from January 2019 a web-based platform that rendered all steps utterly transparent: from submission, via review

process and up to publication, both Authors and Reviewers can have their questions on a paper status answered 24/7, while internationally recognized standards are embraced as the new normal.

Current publications' submissions both quantity and quality, endorsed by the financial potential of the Serbian Medical Society, are making us ponder on monthly editions, however, it most likely wouldn't be implemented immediately.

With all this said, I would like also to take the opportunity to thank our diligent reviewers as we worked closely with all in raising awareness of the importance of timely, accurate and high quality review:
